

MD/DCRC Database Abridged Version

District of Columbia

21 June 2018

Note: This version of the MD/DCRC's DC database contains only the basic data fields associated with each report or record. The full database contains much more information. Please contact the MD/DCRC Secretary regarding detailed data queries.

This version of the DC database conforms to the 2017 58th Supplement to the AOS Checklist:

MD/DCRC Database Status & Decision Definitions

Decision/Status

Definition

Accepted

Reports accepted by the committee.

Accepted-Group

Reports accepted only as to a species group or genus--where all other species of this group are reviewable at the observed location.

DCRC

Records from the (defunct) DC Records Committee baseline.

ID OK?? Origin

Reports accepted for the species/group reported, however, the committee questioned whether the bird was a "natural" vagrant or a "wild" bird.

Not Accepted

Reports not accepted by the committee.

Ready

Reports ready for circulation. All relevant reports, or a sufficient number of reports, have been submitted.

Recirculate

Reports where no committee decision was reached during the latest circulation. The report will be circulated again.

Retracted

Published reports - subsequently retracted by the observer(s).

Reviewable

Reports of a species/location that meets the committee's Review List criteria. Additional observer data is believed to be outstanding.

S&R

Sight records from the committee's baseline document: Stewart & Robbins, The Birds of Maryland and the District of Columbia, 1958.

Unreviewable

Reports with insufficient descriptive identification details to permit a review by the committee. Typical for many older published sight records.
