

President's Corner Birders Gone Wild

by Janet Millenson

The media usually portray birdwatchers as mild-mannered folks wearing sturdy outdoor clothing and battered hats, peering through binoculars at a bird overhead in a park, field, or forest. You and I know that we're actually quite dynamic, dashing, and daring—though certainly no one would call us a menace to society.

Unfortunately, due to recent frenzies over rare bird sightings, our reputation is at risk. To some residents of Frederick County, birders are now about as welcome as a horde of rowdy college kids on spring break. On the one hand, we spend lots of money at local businesses. On the other hand, we sometimes block roads and driveways, trespass (not always unawares), and disturb people, pets, and livestock. The presence of the Northern Lapwing was a mixed blessing for Creagerstown and Thurmont.

Of course *most* birders are considerate and *most* locals are friendly. Yet over the years, unpleasant incidents have occurred: a damaged fence, a night-shift worker awakened during the day, homeowners finding uninvited strangers in the house, the sheriff being called. Somehow the prospect of an unusual sighting makes normally decent people disregard everything they were taught by Mom, Miss Manners, and the ABA Code of Birding Ethics.

So what can be done to reduce such problems in the future? Some have suggested that

VOL. 25, NO. 3

MOS CONFERENCE 2005 ROUNDUP

MAY 20-22 • SOLOMONS ISLAND, CALVERT COUNTY

HEADQUARTERS AT THE HOLIDAY INN SELECT

Winning Pin Design

"This year's conference pin features a beautiful Great Blue Heron in silhouette," John Malcolm announces. The pin was designed by **Teri Christensen** of the Tri-County Chapter.

Teri, who trained at the Corcoran School of Art in Washington, DC, specializes in wildlife art; her preferred medium is colored pencil.

Teri and her husband Gordon had a second home on the Eastern Shore, and they fell in love with Irish Grove. "That's really our second home," Teri says. The Christensens joined MOS while they still lived in Northern Virginia; after they retired (Teri was a software test engineer), they made Crisfield, Somerset County their full-time residence.

John Malcolm points out that "everyone who attends the conference will

receive a pin as part of their registration package. The design will also be available on t-shirts, which will be on sale at the Merchandise Table."

Research Presentations: Stop By

Seven, and as many as nine, Research Posters will be on display during Saturday night's Wine and Cheese Social. The presenters—including three recipients of MOS Research Awards—come from the University of Maryland Baltimore County, Hood College, and St. Mary's College of Maryland. Topics range from "The Genetic History of Maryland's Lesser Snow Goose" to "Orchard Orioles: A Tale of Two Pigments," "Breeding Behavior of Baltimore Orioles in Maryland," and "Water Quality and Foraging Behavior in Wintering Common Loons."

A Pitch for the World Series of Birding: Pledge Now

A new team will be carrying the MOS banner at the World Series of Birding in Cape May, NJ, this year: **Matt Hafner**, Captain (Harford County), **Hans Holbrook** (Howard), and **Jim Brighton** (Talbot) will compete on Saturday, May 14 as the **Maryland Yellowthroats**. The three are experienced and successful in various Big Days, but this is their first venture into the NJ World Series. They will compete in the Cape May County division.

The Maryland Yellowthroats are seeking pledges to raise funds for MOS, typically an amount (10 or 25 cents, say) for each species they tick. **Norm Saunders** has volunteered to serve as a clearinghouse for the pledges (marshhawk@att.net). All profits will go to MOS and will help support the Atlas project.

The team that represented MOS at the WSB in 2004 (and the Montgomery Bird Club before that), the **Holy Order of Loggerhead Shrikes**, has obtained corporate sponsorship (from Eagle Optics and Vortex Optics). For the third consecutive year,

(World Series of Birding continues on page 5)

President's Corner *(continued from page 1)*

MOS send a representative to arrange parking and handle public relations and crowd control whenever a rarity is discovered within our borders. That sounds appealing, but consider the following: First, we're an all-volunteer organization. Those who have the time and desire to chase rarities would undoubtedly rather be birding than acting as unpaid PR reps. (But if you're interested in the job, let me know!) Second, we're not birding cops. People who bird in Maryland aren't necessarily MOS members and often come from other states. They appreciate it when we point out the bird and advise on where to park, but we can't enforce good behavior.

In the end it comes back to individual responsibility and peer-group standards. Please take a few minutes to reread the American Birding Association Code of Ethics (available online at <http://www.american-birding.org/abaethics.htm>). Note the second principle on the list: "Respect the law, and the rights of others." Recognize that sometimes you'll have to park a little farther away from where you'd like, or stay on the far side of a field or fence. Your behavior can determine how Maryland birders are treated in the future—as harmless enthusiasts, or as the human equivalent of a big flock of starlings.

DNR Reports... by Glenn Therres

The Breeding Bird Atlas field season is upon us and I hope you are busy atlasing somewhere in Maryland or DC. DNR is contributing to the Atlas project in many ways, including providing advice, coordination, and financial support. We are also contributing field data to the effort. Bald Eagle nest locations and colonial waterbird colony sites are being provided. We have hired a few good birders this year to survey for elusive rails, bitterns, moorhen, and other obligate marshbirds.

It takes special effort to atlas for secretive birds or birds that are inaccessible to normal field surveys. One such species is the **American Oystercatcher**, due to the need to survey primarily by boat.

In conjunction with our comprehensive survey of colonial waterbirds in 2003, DNR biologists **Dave Brinker**, **Jim McCann**, and **Ashley Traut** surveyed the breeding distribution and population of American Oystercatcher in Maryland. They located a total of 108 oystercatcher pairs that year, with 57 pairs associated with the Chesapeake Bay, 39 pairs in the coastal bays of Worcester County, and 12 pairs on Assateague Island. The Chesapeake Bay pairs were found on the large offshore islands in Somerset and Dorchester counties and along the tidal rivers in Somerset County. They were distributed from the Delaware line to the Virginia line in the coastal bays, mainly on offshore islands and along the marsh edges of Ocean City. Only a few were found on the western side of the coastal bays. Eight of the 12 pairs nesting on Assateague Island were on the north end.

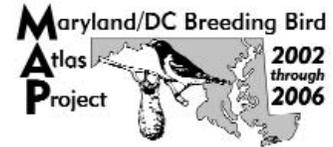

In total, breeding was confirmed in 26 Atlas blocks, with another 17 blocks at the possible or probable level. During the first Breeding Bird Atlas effort, oystercatchers were documented in only 19 blocks. This increase in blocks may reflect an in-filling within a larger, already established breeding range and probably a greater number of breeding pairs in the Chesapeake Bay section.

In addition to documenting nesting attempts, our biologists also documented nesting success of the oystercatcher pairs. Overall, 38 young successfully fledged in 2003. Forty-five percent of the nests monitored successfully hatched at least one egg, and 29 percent of all nests fledged at least one young. This nest success rate is much greater than those in Virginia and North Carolina, where fewer than 15 percent of nests hatch young. The reasons for this regional difference are unclear, though it may be due in part to the higher success rates of Chesapeake Bay nesting oystercatchers. In Maryland, the coastal bay nesting birds had significantly lower success rates than did the Chesapeake Bay birds. The Chesapeake nests had greater vegetation cover than did the coastal nests. This may have helped reduce predation.

At present, American Oystercatchers appear secure in Maryland, though there is growing national and regional concern for this species. Oystercatchers are an uncommon, localized nesting bird in our State, restricted to salt-marsh island and barrier island habitats. Over the long term, the future of our breeding population will hinge on the availability of suitable estuarine island habitat. Efforts to save the Chesapeake Bay and our coastal bays will help conserve our oystercatchers. Hopefully, we can keep our oystercatcher population secure in Maryland.

OUR INTERNET ATLAS

BY WALTER ELLISON

An atlas is a large, complicated endeavor with a lot of interlocking parts. Given the end product of an atlas is a collection of well-studied plots of land that produce detailed range maps for a region's birds, it is not surprising that most of my articles have focused on issues of coverage, and what the Atlas maps are telling us about the effects of two decades of change on our breeding birds. In the process I have neglected another important aspect of the 2002-2006 Maryland and DC Breeding Bird Atlas (BBA). That is, we are the first North American atlas project to use online data entry via the Internet.

By now, both Vermont and Pennsylvania have Internet atlases, and projects in New Mexico, Michigan, and Indiana will soon be online. Ours was essentially the pilot project for an online data entry system established at the U.S. Geological Survey's Patuxent Wildlife Research Center by Patuxent database manager Mark Wimer and biologist Bruce Peterjohn. We have been the "beta testers" for this new system. Vermont, New Mexico, Michigan, and Indiana are also using the Patuxent data entry system; and Pennsylvania is using a system being devised by the people at Bird Source in Ithaca, New York, who are also involved in online data entry for National Audubon's Christmas Bird Count and eBird, among other projects.

Although the process of establishing data entry has not been without frustrations—these have ranged from the usual trouble with a fairly complex automated system ("I just hit the wrong button and lost my work!"); to technical difficulties imposed by relying on host computers ("servers," in Internet jargon); to delays imposed by site upgrades—Maryland Atlas volunteers have done a great job of adjusting to using their computers and the Internet to send in their data, and coordinators to review the data for public display.

One of the ideals Patuxent and MOS sought at the start of this Atlas Project was timely display of current and past data, both in maps and summary tables. As I write, this hope has become a reality. The new USGS *BBA Explorer* is now available to the public at <http://www.pwrc.usgs.gov/bba>. The page displays several linked options in an array of concise text boxes, including "About BBA Explorer," "Showcase" (for people on their first visits), and "Links to Related Sites" on the left, "Breeding Bird Atlases" (subdivided by "in progress" and "published") in the center, and the "North American BBA Viewer" on the right. The published atlases include results from 15 states and one Canadian province.

The links of most immediate interest to Maryland birders are those to the 1983-1987 Maryland and DC Atlas, to the in-progress MD/DC Atlas, and to the BBA Viewer where the map-making wizardry is available. The two MD/DC project home pages are structurally very similar. Both allow a

visitor to view atlas data in a variety of tables and provide access to details of project methods. It is now possible to view all of a single bird species' reviewed atlas records, to look at block data with direct comparison to 1980s results, to see results for each individual county, or to peruse the entire bird species list for the project to date. On the right of the active project's page is the login form for coordinators and atlas block workers to enter sightings or work with data.

The BBA Viewer opens as a pop-up window—so turn off any pop-up blocking program when using the Explorer. The key feature to use here, if you don't require any background information, is the "Make Maps!" button. Once you arrive at the mapping page, it is possible to view all published atlas data combined, or to select individual or current project data. I don't have room in this article to provide a tutorial on how to use the atlas-mapping site. Suffice it to say that some experimentation with the provided menu items will show what the site is capable of offering a curious birder. There is one caveat; the mapping program can be very slow, especially on dial-up Internet accounts. The site's speed should improve by the time you read this article, but be aware that it takes the program some time to call up and display hundreds to thousands of individual bird records.

Once again Maryland is a pioneer in North American atlasing. Two Maryland counties hosted the first breeding bird atlases conducted on our continent. Now we are the first project to attempt pure Internet entry and display of project results before completion of data collection. In spite of growing pains, we have been successful in helping the designers of this system develop and improve it. Most importantly we have also entered and reviewed our data—data critical for making timely conservation and land-use decisions.

Atlas Wish List

With advancing technology, I increasingly encounter a problem in giving atlas-update talks. The old-style (and often wonderful) slide show is rapidly giving way to the computer slide presentation—in fact, Kodak has ceased manufacturing slide projectors. Many libraries and institutions have invested in PowerPoint projectors, enabling me to make presentations that may be quickly revised. However, most of these institutions require the lecturer to either bring a laptop or deal with an occasionally incompatible computer. The Atlas-dedicated computer purchased by MOS is, by necessity, a desktop for doing a variety of office-based tasks. Having a Windows-compatible laptop with a CD data drive would be most helpful in planning and giving lectures. I am hoping someone in the MOS membership might have an older laptop they are putting out to pasture and that they might donate to the Atlas Project as a tax deduction. Please contact Walter Ellison at rossgull@baybroadband.net if you would like to help out.

As always, monetary donations to the Atlas Project are most welcome. We need the funding to help finance our blockbusting and miniroute field work. Donations should be sent to Treasurer Emy Holdridge and made out to MOS with annotation directing the funds to the Atlas on the memo line.

The Conservation Connection

By Maureen F. Harvey

IN MARYLAND

MOS Critiques Proposed Sale of State Lands. Several members provided comments to the Conservation Committee on tracts of MD State lands listed by Dept. of Natural Resources (DNR) in response to Governor Robert Ehrlich's request for an evaluation of all State lands that could be considered for sale. The Committee extends grateful thanks to the following members for their thoughtful research and comments on 13 of the tracts identified by DNR: Marcia Ballestri, Frederick; Deb Bowers, Harford; Tracy Eve, Howard; Peter Lev, Baltimore; Gail Mackiernan, Montgomery; Don Messersmith, Montgomery; and all those unnamed birders who helped compile the data. Following public outcry, Governor Ehrlich has stated that public parks won't be sold; however, we remain skeptical. A letter was sent to DNR Secretary C. Ronald Franks with MOS's general comments about the process of State land sales and specific comments on the 13 tracts. This letter may be read from the Conservation page on the MOS website (<http://www.mdbirds.org/>).

MOS President Testifies in Annapolis. Janet Millenson testified before the Economic Matters Committee on March 8 in support of legislation to change the rules on how the State disposes of public lands. Bills have been submitted to require public input and legislative oversight when public lands are considered for sale. She emphasized the value of public lands not only for wildlife conservation but also the significant economic impact of birders.

Your Letters Matter, Too. Every voice counts in getting the message out that birders care about Program Open Space (POS) and land conservation. Please take the time to contact your MD State Delegates and Senators. Your opinions count and help guide their decisions. Partners for Open Space, a coalition of groups (including MOS) concerned about POS funding issues, suggests that you request full funding for all of MD's land conservation programs, legislation that prevents future diversions of the POS transfer tax without repayment, and legislation that provides the MD legislature with oversight of the proposed sale of State natural resource and park lands. A sample letter was emailed to MOS Chapter Conservation Reps and may be copied from the MOS website's Conservation page. Go to <http://mlis.state.md.us/> to find contact information for your legislators.

Roth Rock Wind Power Project. MOS, which registered as an interested party, has been receiving copies of all papers filed with the Public Service Commission (PSC) regarding Case No. 9008, **Synergics Wind Energy, LLC**. Synergics of

Annapolis proposes to build 23 wind turbines near **Roth Rock**, a well-known Garrett County birding hot spot. D. Dan Boone, Maryland Chapter of the Sierra Club; Jon Boone, the Friends of Backbone Mountain; Alice "Ajax" Eastman, the Audubon Naturalist Society of the Central Atlantic States, Inc. (ANS); and the Maryland Alliance for Greenway Improvement and Conservation, Inc. (MAGIC) have filed with the PSC as intervenors in opposition to the project. The paperwork is pretty amazing, with questions and answers filed back and forth among the different parties. Dan expects the evidentiary hearings and surrebuttal testimony to be very interesting. A public hearing will be held in Garrett County (date, time, and location to be determined). Current information on PSC Case No. 9008 can be found at <http://www.psc.state.md.us/psc/>.

Cove Point Update. MOS Conservation Committee contributed \$150 to the Maryland Conservation Council (MCC) in 2004 to help the MCC and Sierra Club with the legal costs of preparing an agreement with Dominion Resources, which purchased the Cove Point Liquefied Natural Gas (LNG) storage facility in September 2002. The Cove Point LNG facilities include LNG storage, a marine terminal, and an 87-mile natural gas pipeline connecting the terminal with gas pipelines in Northern Virginia. The agreement with the previous owners resulted in the formation of the Cove Point Natural Heritage Trust. The revised agreement allows Dominion Resources to make a final expansion of the LNG facility to accommodate the current market for LNG and to operate the facility for as long as commercially viable. In return, the Cove Point Natural Heritage Trust will receive significantly increased revenues (going from \$120,000 per year to \$250,000 in 2008) to carry out valuable natural conservation work in Calvert County. The unique aspect of both the original agreement and the new agreement is that an energy facility is permitted to operate within a natural heritage site, with the requirement that the entire site be returned to a natural state when the facility closes.

IN THE NATION

Migratory Bird Treaty Act of 2004, passed by Congress as part of the Omnibus Spending Bill of 2005, has **eliminated protection for nonnative species**. European Starling, Rock Pigeon, House Sparrow, and Mute Swan are specifically identified as exotic invasive species. Consequently, the USFWS prepared new rules for implementing the MBTA and requested public comments. MOS signed a letter prepared by the American Bird Conservancy (ABC) that was mainly in support of the new rules, with suggestions for clarifying certain definitions. These new rules will enable MD DNR to pursue its Mute Swan Management Plan. MOS members may also find it interesting that the new rules will forbid the release of exotic invasive species into the wild. This ban may affect species that wildlife rehabilitators accept for care, and it may also affect bird banders using mist nets. MOS Conservation Committee Chair emailed a thank-you note to Congressman Wayne T.

Gilchrest (R, MD) and his assistant Edie Thompson for proposing and working on the passage of this important legislation.

MOS Signs ABC Letter Protesting Bird-Killing Pesticide.

MOS was among 36 environmental groups that signed a letter prepared by ABC to the Environmental Protection Agency. This letter urges the EPA to deny Louisiana's request for an emergency permit to use granular carbofuran to control rice water weevils on substantially the entire rice acreage in the state. This pesticide has been documented to have killed over 100 different species of birds. The letter states "[W]e strongly believe that an emergency condition under Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) does not exist and that carbofuran use on as many as 300,000 acres will present unreasonable adverse effects to the environment, violating not only FIFRA, but the Endangered Species Act (ESA), the Bald and Golden Eagle Protection Act (BGEPA) and the Migratory Bird Treaty Act (MBTA). Thus, EPA is legally compelled to reject the Applicant's request. EPA's legal basis for rejecting this request is further strengthened by EPA's correct decision to revoke a similar Section 18 exemption request by the same Applicant in 2002." The letter further states, "Importantly, U.S. Fish and Wildlife Service (USFWS) has independently determined that there are no known conditions under which carbofuran can be used without killing migratory birds." A link to the full letter is available on the MOS website's Conservation page.

Red Knot Endangered, Despite Conservation Efforts.

A coalition of environmental groups, including ABC, has begun proceedings to have the *rufa* subspecies of the Red Knot protected under the Endangered Species Act. The *rufa* subspecies population has fallen as much as 60 percent since the late 1980s. This is the population that winters in Tierra del Fuego and other parts of South America, migrating some 9,000 miles to Arctic breeding grounds in Canada. The Red Knots' most important stop-off point is Delaware Bay, where they feed on horseshoe crab eggs to sustain them on the long journey north. Overharvesting of the crabs for use as bait in conch and eel pots has been linked to the Red Knot's decline. Conservationists have predicted that, although the population still numbers in the tens of thousands, the bird's low reproductive rate could spell peril if declines continue. On the positive side, efforts to protect horseshoe crabs and, thus, the shorebirds that rely on their eggs, appear to be paying off. In 2004 the take of horseshoe crabs reached its lowest level in more than a decade, with Delaware Bay landings 53 percent lower than in 2003. If the USFWS decides to proceed with the listing process, they will initiate a public comment period, and ABC will keep us informed.

World Series of Birding *(continued from page 1)*

the team members will be **Don Simonson** (captain), **John Hubbell**, **Gordon Gover**, and **Andy Rabin**. Don, John and Gordon (who lives in New Jersey) are current members of the Montgomery club, and Andy is a former member (who has decamped to Northern Virginia).

Once again, the Shrikes will be competing in the Cape May County division, trying to top their 2004 total of 148 species, with 100 percent of all donations going to Pronatura Veracruz, a grassroots conservation organization in Mexico. Pledges can be directed to the team's website, www.holyshrikes.com, or to Don at 301-840-0223, or don.simonson@comcast.net.

Also competing in the World Series is a Youth Team from Queen Anne's County, which is sponsored by Steiner Optics. This year's team consists of **Jessica Voorhis**, **Hilary Staver**, **Ben Thiesse**, and **Jim Wilson**. This will be the sixth WSB competition for Ben and Jim and the fourth for Hillary and Jessica. They are accepting pledges for the Chesapeake Bay Environmental Center (aka Horsehead). Last year the team found 143 species in Cape May County.

Yet one more entrant is **Zach Baer** of Queen Anne's, the sole Marylander on the **Nikon/Space Coast Coastal Cuckoos Youth Team**. Zach's pledges are destined for Pickering Creek Audubon Center. The Cuckoos' goal is to raise (collectively) over \$7500 and to break the 200 mark for the state.

BOARD BULLETINS

New Sanctuary?

At the State Board meeting on March 12, President Janet Millenson announced that a developer would like to donate 80 acres in southern Prince George's County for an MOS Sanctuary. With Board approval, the Executive Committee is exploring the pros and cons of this offer.

Welcome to the Team:

Gayle Bach-Watson, Frederick: Liaison for the Environmental Fund for Maryland
Helen Horrocks, Frederick: Mailing Lists
Linda Keenan, Patuxent: Membership Chair
George Radcliffe, Talbot: Youth Programs

Now Seeking:

Calendar Editor
Chair, Sanctuary Committee
Chair, Development Committee
Liaison, Important Bird Areas Program

Frederick Bird Club's Lyn and Skip Nelson: The Lapwing Connection

After selling their home and business a few years ago, Lyn and Skip Nelson have been free to indulge in most every birder's fantasy of travel and birding around the world. They saw their first Northern Lapwing in Northern Ireland a few years ago. But it was their second sighting, on Black's Mill Road in Frederick County this past February, that created a sensation.

The couple had just returned from five days of owling/birding in Minnesota. They arrived home at 4:30 a.m., couldn't sleep, and so decided to head out for Frederick County's mid-winter bird count. In spite of being exhausted, they kept moving until about 4:30 that afternoon, when they decided to call it quits. Skip wanted to check out a house where he lived as a teenager, so their last stop on the way home was Black's Mill Rd.

Skip noticed a movement in the field, and asked Lynn to check out what he presumed to be a Killdeer.

"It's not a Killdeer, but a Northern Lapwing."

"It's too big for a Longspur."

"You're right. It *is* too big for a Longspur. It's a Lapwing."

Still not understanding her, Skip started to drive off. Then stopped himself. "It's a Kestrel taking a bath in the snow melt."

"No. It's a Lapwing. Look at that crest."

When Skip finally looked at the bird with his binoculars he saw "one of the most beautiful birds to visit our shores from afar."

"So now you see our problem. No camera (we still had not unpacked from Minnesota), therefore no proof. The bird would not exist in the eyes of anyone, including that dreaded body—THE RECORDS COMMITTEE.

"It's Saturday night. I report the bird and am met with. . . well, let's just say they

chalked this bird sighting up to sleep deprivation. Now, I can't sleep again, as the list chasers will surely be out in force early Sunday. My stomach is in a complete knot just thinking about it.

"Saturday night comes and goes....no sleep. Sunday, 2:30 a.m. . . still no sleep. What if the bird is not there the next morning? Will we be laughed out of the state? 3:00. . . 4:30. . . no sleep. 7:30 a.m., make coffee. Go birding with Lyn: White-throats, bluebirds, and a Sharp-shinned Hawk show up to help me forget, at least for a moment, the queasy feeling that has developed in my stomach.

"Check my e-mails. I see that the sighting has been posted and sent out. Now the bird just needs to be there. 9:30 a.m.: can't wait any longer. I call Gary Smyle. If anyone can dog this bird, it's Gary. Maybe it's just a Killdeer? Oh no! Any bird except a Killdeer. How many birders are there now questioning the sighting and thinking, 'That sleep-deprived idiot strung us along with a Lapwing that was really a Killdeer.'

"I do laundry. Well, I put clothes in the machine. Did I put in detergent? I can't remember.

"Noon comes and goes. 4:30 comes and goes. No word from anyone. Can't stand it anymore. Lyn wants to go look for owls. Drive to Washington County. Even the owls won't talk to me.

"Get back home. Call from Gary. He has pictures! It's now 10:30 p.m. Sixty-three hours straight with no sleep. The only thing I can say is, 'I hope I don't have to go through this again if I get another bird like this one—well, until I get at least eight hours of sleep.'"

Skip and Lyn will be posting their next nine months of travel out of the country on their blog: Out of the Box at <http://www.surfbirds.com/blogs/YungasManakin/>

Maryland's Record Northern Lapwing: The Rest of the Story—reported by Jim Peters

Jim was recently informed by the Maryland/D.C. Records Committee that thanks to his Fort McHenry observations, five new birds—Great White Heron, Western Kingbird, Ash-throated Flycatcher, Black-tailed Gull, and Spotted Towhee—have been added to Maryland's records.

Members who list life birds will be interested to know that world-class birder Dr. Natty Bumpass recently visited Creagerstown in Frederick County to see

the Northern Lapwing. Dr. Bumpass is an expert on the world's plovers and is responsible for the following field observations regarding the Lapwing seen on Graceham and Black's Mill Roads in Frederick County this past February.

Sadly, for birders who had hoped to add this rarity to their life list, the good doctor noted that the color of the bill, feet, and legs suggest a bird that has been on a captive diet. Further, after calculating the aspect ratio of its wings, and the magnetic heading of its flight path, Dr. Bumpass concluded that the bird's destination was most certainly from the direction of the Catoctin Mountain Zoo, whence it undoubtedly made its escape sometime in early February.

Dr. Bumpass has concluded that, in his expert opinion, the bird does not pass the "smell" test of a true wild lifer and therefore cannot be counted.

After making this pronouncement at the Black's Mill Road site in the presence of birders, Dr. Bumpass was brutally beaten with a scope and tripod. Two hours later, an unnamed birder called 911 and a helicopter was immediately dispatched. Dr. Bumpass was air-lifted to the Johns Hopkins ER in Baltimore.

Witnesses overheard the suspected female assailant muttering that, due to a late report filed by an irresponsible birder, she missed adding a Connecticut Warbler to her life list last fall. She added, "I'm not about to let Dr. Bumpass take away another lifer by declaring this Lapwing uncountable."

Frederick County sheriffs investigating the attack found a bent Zeiss Diascope at the scene, but its owner had already fled.

Dr. Bumpass is currently in intensive care and is expected to survive. He has decided to focus his future research on composting sparrow manure where he is "less likely to engender the wrath of birders."

If you are not too upset at losing this irreplaceable Maryland life bird, you might want to send a get-well card to Dr. Bumpass, at the Critical Care Unit at Johns Hopkins Hospital, Ward B, Room 1021, Baltimore 21122.*

**Forget the card. Dr. Bumpass has been released from Johns Hopkins and continues to recuperate at an undisclosed location outside of Maryland.*

(A Belated Happy April Fool's Day to You!)

Carey Run Work Day

When asked, "What's the latest news from Garrett County?" Barb Gaffney immediately shot back, "How many ways can you say ice and snow?" She quickly added: "The Carey Run Work Day is scheduled for April 30 this year. Hopefully the snows of Garrett County will be a memory by then! Doug Parker and I have many projects we need help with. Please clear your schedule for April 30th and join us. We should also have some great birds by then.

"We will start at 8:30 a.m. The Allegany Chapter will provide the meat and drinks. Please bring a covered dish to share and join in the fellowship of Carey Run.

"It would be helpful for all interested persons to contact Doug or myself so we know how many dependable helpers we'll have. Doug can be reached at parkernk-da@aol.com or 301-663-1909. I can be reached at gaffneyg@mindspring.com or at 301-895-4646.

"We all belong to MOS and we all need to participate in the maintenance of our sanctuaries. Please join us April 30 at 8:30 a.m. If you can't be there by 8:30, please come when you can.

"If you've never been to Carey Run, this is your big chance to see what a beautiful sanctuary we have and to help keep it running in tip-top shape. MANY HANDS MAKE LIGHT WORK."

—Barbara Gaffney

Harford Bird Club Announces Annual Awards

Birder of the Year: Dave Ziolkowski. In recognition of his outstanding service to the club, organizing and leading field trips, and presenting programs at meetings. His enthusiasm for birds and the environment has enriched us all.

Bird of the Year Award: A pair of nesting Dickcissels on the farm of Garnet and Gloria Anderson. The award was presented in appreciation for the Anderson's preservation of habitat conducive to grassland species. The Anderson property is part of the world-famous Bradenbaugh Flats.

Volunteer of the Year Award: Gary and Barbara Pensell. They have generously volunteered the use of their boat on the CBC for many years, enabling us to spot waterfowl on the Susquehanna River Flats. Gary, along with Peter Jay, was instrumental in saving Garrett Island in the Bay from developers.

Rookie of the Year: Tom Gibson. Since his retirement, Tom has renewed his interest in birds and birding, participating in the Atlas, field trips, and club activities. His recent purchase of a scope shows he is past the point of no return!

Harford Bird Club Donates to Two Worthy Endeavors

"Once again we have supported the Harford County Envirothon Contest. This is a conservation education program for high school students, designed to test their environmental knowledge and cultivate a desire to learn more about the natural world. We have for the first time also contributed to the Harford County Environmental Scholarship. This year Harford County Public Schools are partnering with Eden Mill Nature Center. The scholarship is awarded to graduating students with outstanding academic achievement and stewardship in the study of environmental science. As a thank-you for our gift, Eden Mill Nature Center extends a free one-year corporate membership to every person in our club."

—Rick Cheicante

Montgomery County: What a Louse!

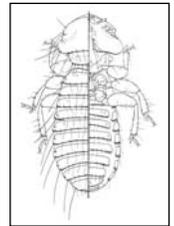

It started with a 1980 Earthwatch project in Trinidad, and it culminated, in 2003, in the insect hall of fame. Four members of the Montgomery County Chapter of MOS (now the Montgomery Bird Club), Morrill (Don) and the late Margaret Donald, Bill Oberman, and the late Ed Smith were looking for an opportunity to mist net in the American tropics. They joined Earthwatch in a survey of the chewing lice of birds (Insecta: *Mallophaga*).

"The role of the MCC/MOS team," Bill Oberman writes, "was to set up and monitor mist nets and collect trapped birds for the research staff to examine. The birds were dusted with silica gel and placed in a fresh plastic bag for 20 minutes, during which any ectoparasites died from desiccation. Birds were then set free, unharmed, and any parasites, including lice, were placed in alcohol for further examination."

In 12 days of netting, the team processed 310 birds, 110 of which harbored lice. When the results were at last published in August 2003, it turned out that three of the specimens were previously undescribed species, and each of them has been given a name honoring a member of the MCC/MOS team.

"Thus we have *Leremenopon donnaldorum* for a louse found on a White-cheeked Emerald Hummingbird, *Leremenopon obermani* found on a Rufous-breasted Hermit hummingbird, and *Myrsidea edgarsmithii* found on a Golden-headed Manakin."

In subsequent years, the MCC/MOS team followed the Earthwatch project to Jamaica, Venezuela, and Peru. "This is one more good example," Bill writes, "of how an interest in birding can lead you into more interesting experiences in the field and add to our scientific knowledge of ornithology while having a very good time."

Leremenopon donnaldorum

Tri-County Bird Club Volunteers

Besides being very active in the Tri-County Bird Club, members Betty Pitney and JoAnn Wilbur also donate hundreds of hours to the Ward Museum of Wildfowl Art in Salisbury. Throughout the month of February, their art work was on display in the museum as part of the Volunteer Art Exhibit. Betty, whose medium is pastels, featured a Semi-palmated Plover and a White-breasted Nuthatch while JoAnne, who works in both oils and pastels, exhibited a Bald Eagle.

—Carol Broderick

Need a rehabber for an injured bird or animal?

Kathleen Woods, a Maryland- and US Fish and Wildlife-licensed master wildlife rehabilitator, has forwarded a website identifying all licensed rehabilitators in the state. The list, developed by the Department of Natural Resources, can be found at www.dnr.state.md.us Kathleen lives in Phoenix, Baltimore Co, and her clinic number is 410-628-9736.

Many thanks to Gail Frantz for her fine work in producing a lively Chapter Chatter this past year. She now passes the baton to Shireen Gonzaga, who will be happy to receive your contributions at whimbrel@comcast.net.

MINUTES OF THE MOS BOARD MEETING DECEMBER 4, 2004

President: Janet Millenson
Vice-President: Marcia Balestri
Treasurer: Emmalyn Holdridge
Secretary: Janet Shields
Past President: Paul Zucker

Atlas: Jane Coskren
Conference: Janet Shields
Conservation: Maureen Harvey
Investments: Martha Waugh
Long-range Planning: Paul Zucker
Research: Gwen Brewer
Sanctuary: Dotty Mumford
Yellowthroat: Lydia Schindler

Allegany: Gwen Brewer,
 Barbara Gaffney
Anne Arundel: Linda Baker,
 Al Haury, Dotty Mumford
Baltimore: Helene Gardel
Caroline: *not represented*
Carroll: Maureen Harvey,
 Bob Ringler
Cecil: *not represented*
Frederick: Doug Parker, Nancy
 Parker, Michael Welch
Harford: Thomas Congersky,
 Randy Robertson
Howard: Jane Coskren, Karen Darcy,
 Jeff Friedhoffer, Martha Waugh
Kent: Walter Ellison
Montgomery: Hugh Mahanes,
 Don Messersmith, Don Simonson,
 Rick Sussman, Ann Weeks
Patuxent: Fred Fallon,
 Chan Robbins
Talbot: Shirley Bailey
Tri-County: *not represented*
Washington: *not represented*
At large: Dave Brinker

President Janet Millenson called the meeting to order at 10:05 a.m. and thanked the Montgomery County Chapter for hosting the meeting at Black Hill Regional Park, Boyds.

Minutes of the previous meeting were approved.

Treasurer's Report: Emmalyn Holdridge noted that in the distribution of the World Series of Birding proceeds, the Veracruz project

received more than its share. The correction will be made with the 2005 WSB distribution.

President's Remarks: Janet Millenson announced that on October 2 Cylburn celebrated its 50th anniversary. Baltimore Chapter gave Cylburn a very generous donation of \$5,000. MOS, which uses Cylburn as a mailing address, donated \$500. The meeting of the Parks Advisory Commission was postponed to mid-February. There is a new supply of our MOS brochure. Also, new membership cards are available. MOS needs to find better ways to get information to the chapters and find people to fill vacant positions on the state level.

COMMITTEE REPORTS

American Bird Conservancy: Paul Zucker attended the kickoff meeting of the Bird Conservation Alliance, an offshoot of the American Bird Conservancy. He reported that this group is basically a pro-bird lobbying and information group situated in Washington. They just held a meeting attended by more than 100 people representing organizations from all over the country; the meeting explored how the organization will function and operate.

Atlas: Jane Coskren said the committee has been assessing its progress on the Atlas and is overall very pleased. They still need volunteers and money. There will be an extra push for blockbusters. Walter Ellison reported that more than 1,150 blocks out of 1,282 have some coverage. As of October, 140 blocks have no data and 130 blocks are in the 1-20 species range. Most of the work needed is in central and western Maryland.

Conference: The registration brochure should be out the end of January or first week of February, according to Janet Shields. The Rocky Gap contract for the 2006 conference is being negotiated and should be completed shortly.

Locations for 2007 are being researched. Pin contest entries are due by January 17.

Conservation: Maureen Harvey reported that the Baltimore Bird Club's Conservation Committee needs 500 more copies of their Shade-grown Coffee flyer and asks if someone will do this gratis. Doug Parker agreed to do this. The rest of Maureen's report appears in the January/February issue of the *Yellowthroat*.

Investment: Martha Waugh's written report was distributed to board members. Total income so far this fiscal year is \$28,353.53, and the total portfolio value is up considerably to \$1,377,298.95.

Scholarship: Reporting for Tom Strikwerda, Maureen Harvey announced that January 31 is the deadline for scholarship applications. This needs to be announced by each chapter.

Long-range Planning: Paul Zucker announced that all of the changes to the Manual of Operations that were approved at the last Board meeting have been incorporated. The one issue deferred to today was budgeting for the endowed committees. After discussion, the following motion was approved: "In considering the budgets for the endowed committees for the coming fiscal year, the Budget Committee will limit the budgeted amount as follows: the sum of the current fiscal year's earnings from the endowment, earmarked contributions received during the current fiscal year, anticipated external grants to be received during the coming fiscal year, and a carryover amount equal to the unspent funds during the current fiscal year, but the carryover amount shall be limited to the amount of the endowment earnings during the current fiscal year."

Research: Gwen Brewer reported on a recent meeting of the Research Committee, and summarized its activities. Over the past ten years, MOS has awarded \$28,000 for 16 grants. Over

the past three years, 16 posters have been presented at the MOS conferences, four of them by grant recipients. Nine of the 16 grants were funded in the last three years. The committee is anxious to promote research at our sanctuaries and is working with the Sanctuary Committee to accomplish this. More information on current and future research projects will be on the web page.

Sanctuary: Dotty Mumford reported that Sue Ricciardi has been revising sanctuary information on the sanctuary web page. There was an Irish Grove work session from Sept. 23 to Oct. 11. Projects have been ongoing at Carey Run with help from Doug and Nancy Parker and local members.

WOS/AFO Meeting: Chan Robbins noted that there will be a large, joint meeting April 21–24 of the Wilson Ornithological Society and the Association of Field Ornithologists in College Park. Patuxent is a sponsor. MOS will provide “Yellowbooks” and *Birdlife* CDs, and Fred Shaffer is organizing field trips.

MD/DC Important Bird Areas

Program: David Curson, Director of bird conservation for Audubon MD-DC, explained that Audubon is trying to increase its conservation work. David’s job is to lead that effort, with a focus on revising the Important Bird Areas Program. An article by David explaining this program and giving contact information is in the January/February issue of the *Yellowthroat*.

Public Lands Policy Discussion:

Janet Millenson pointed out that there might be valid reasons for the state to get rid of small parcels of land, but a lot of people are not confident that the criteria for determining whether something is valuable enough to be preserved as a park take into account the needs of the birds. We want to make sure our voice is heard. Maureen Harvey’s *Yellowthroat* conservation article explains where the complete list of properties can be found and how to make your voice heard. Maureen would like to have each chapter assess the properties on

the list that fall into their area and report back by January 5.

Former Orville Crowder Property:

Don Messersmith reported that Hidden Valley (former property of the late Orville Crowder) in Harford County is part of the land the State of Maryland is considering selling. Orville Crowder was one of the founders of MOS, he was its second president, and he founded six of our chapters. Hidden Valley, or Lost Valley as Orville called it, was made a wildlife sanctuary in 1949. It was sold to the state for a wildlife sanctuary for \$85,000. The property consists of 150 acres in a rural setting. With its close association to Orville Crowder, Don Messersmith would like the Board to consider purchasing this property from the state as another sanctuary. Janet Millenson will form a subcommittee consisting of Doug Parker, Don Messersmith, and Dennis Kirkwood to look into this.

OLD BUSINESS

None

NEW BUSINESS

None

ANNOUNCEMENTS

Marcia Balestri announced that we have a new EFM Representative, Gayle Bach-Watson, a new Frederick County member.

NEW ACTION ITEMS

- Executive Council to create a list of MOS Board vacancies with brief descriptions. Board positions still needing to be filled: Development, Membership, Publicity Coordinator, Sanctuary, and Youth Programs.
- Executive Council to define the Executive Secretary role and draft language for inclusion in Operations Manual.
- Executive Council to request chapters to schedule one birding field trip/workday each year at a sanctuary.
- Chapters to announce Pin Contest for Solomon’s Island convention. Submissions are due to John Malcolm by January 17, 2005.

- Chapters to ask members to send letters to the Governor and State Legislators about Program Open Space.
- Chapters to submit scholarship applications to Tom Strikwerda by January 31, 2005.
- Chapters to assess Open Land areas in their respective counties and provide information on their status by January 5.
- Chapters to identify an MOS member with statewide birding knowledge to volunteer as our liaison to the Important Bird Areas Program.
- Chapters to remind members about year-end giving to the Atlas fund.
- Sanctuary Committee to draft “wish list” for items to be donated for the sanctuaries. This will be posted in the *Yellowthroat*.
- President to meet with Doug Parker, Don Messersmith, Dennis Kirkwood to discuss potential new sanctuary.
- Treasurer to call Fred Shaffer to coordinate with Chan Robbins on field trips for the WOS/AFO meeting.
- Janet Shields, Marcia Balestri, and Janet Millenson to provide MD checklists, “Yellowbooks,” MOS pamphlets, and *MD Birdlife* CDs to Chan for WOS/AFO meeting.

President Janet Millenson adjourned the meeting at 1:55 p.m.

Respectfully submitted by
Janet Shields,
Secretary

THE 2004 LIST REPORT

This is the 19th year that the Maryland List Report has been compiled and published. The list was begun in 1986 by Harvey Mudd, was taken on by Phil Davis in the early 1990s, and then was passed on to Norm Saunders with the 2001 List Report. We sincerely hope that the list is taken in the vein in which it is meant—a way to have fun with our listing mania. If some have stopped reporting their lists because they feel the competition has become too intense, please understand that this is for fun and that we would love to see you return. We're headed for a generational switch and we hope that all of you, young and not so young, hang in there and watch the evolving skills of so many fine young birders here in Maryland.

2004 was a superb year for diligent Maryland birders to make big improvements in their life lists. Perhaps we should take a moment to pay homage to some of the truly wonderful birds of 2004: Bohemian Waxwing in Queen Anne's County, Purple Gallinule in Montgomery, Swallow-tailed and Mississippi Kites in Cecil, Hudsonian Godwit in Kent, White-faced Storm-Petrel in Maryland waters, Cave Swallows all over the place, Lazuli Bunting in Somerset, Calliope Hummingbird in Prince George's, Curlew Sandpiper on Assateague Island, Loggerhead Shrike in Washington, and, thanks to the MD/DC Records Committee, Cackling Goose throughout the state. And now. . . back to the list report!

To quote Mark Hoffman (obviously a fan of *Men in Black II*), "All hail, Jim Stasz!" And what else is there to say? Stasz (Calvert County) added an unprecedented five species to his **Maryland Life List** to move into a one-species lead over Mark Hoffman and Paul O'Brien, sporting a MD total of 386 species. The notion of a 400-species Maryland life list is no longer in the realm of the seemingly impossible! O'Brien (Montgomery) and Hoffman (Carroll, but in real life known as "Mr. Worcester County") kept the race tight, though, each adding four species to remain within one of Stasz.

Spots four, five, and six are taken by Northern Virginia's Paul Pisano (374), Montgomery's Harvey Mudd (371), and Wicomico's Sam Dyke (365), and we now have 20 people reporting Maryland life list totals in excess of 350 species and 76 in the coveted MD 300 Club.

Maryland's Young Turks made impressive showings this year in the **Annual List** category, led by new birder Mike Burchett of Queen Anne's, who tallied 329 species, even more impressive if you understand this was only one species short of tying Jim Stasz's record big year in 2000. Mike was followed closely by Hans Holbrook of Howard County with 327 species. Matt Hafner (Harford) and Jim Stasz (NOT a Young Turk) saw 320 species and Dave Powell (Montgomery), a man who has been birding only six years, saw an impressive 319 species. Zach Baer (Queen Anne's) joined the over-300 group for the second year in a row with his 2004 tally of 303 species, and he continued to move up the ranks to a life MD total of 335 species. Watch for him again this year in the World Series of Birding!

The annual Most Improved List Award (for those with 300 or more species in Maryland) goes to Mike Burchett, who added 67 species last year, jumping to 332. Barbara Gearhart of Frederick added 35 species and Ray Kiddy of Allegany added 32, while John Hubbell and Dave Powell, both of Montgomery, added 27 species each.

Henry Armistead (Talbot via Philadelphia) continues as the undisputed leader of the **Maryland Yard List** category, upping his Talbot County farm to 265 species and taking **Annual Yard List** honors as

well, with 160 species. Patty Craig of Saint Mary's took second place for 2004 with 149 yard species; Norm and Fran Saunders (Worcester) came in third with 142 species at their West Ocean City getaway. Fully nine birders reported 100 or more species from their yards last year.

The **Maryland Total Tick** category continues to be dominated by Stasz, Bob Ringler (Carroll), and absentee Marshall Iliff (Southern California), the only three Maryland birders with Total Ticks in excess of 5,000 species. Add in Harvey Mudd, and we have the four Maryland birders who average more than 200 species per county! Hans Holbrook and Dave Powell both beat out Stasz for the highest **Total Tick of 2004** with 3,021 and 2,528 species respectively (Jim had 2,457 species). John Hubbell was a close fourth with his tick of 2,316.

The **All-County List** still has Jim Stasz, Bob Ringler, and Marshall Iliff in the top three positions, but Ringler managed to add seven species this year to pull ahead of Marshall for the first time. Hans Holbrook added 18 closeouts to raise his list of birds seen in all Maryland counties to 42 and Dave Powell added 16 species to raise his total to 51. For what it's worth, Jim Stasz reported that he had seen Cackling Goose in 22 of Maryland's 23 counties *before* the Records Committee had even begun considering the bird for inclusion on the state list. What a guy!

A new category this year, **Species Photographed in Maryland**, drew nine folks out of the woodwork. No surprises here: Stasz (356), George Jett (325, Charles), and Arlene Ripley (236, Calvert) hold the top three spots. Is it true that Stasz has more bird photographs that have never been submitted to the MD/DC Records Committee than anyone else in the state? Maybe we should make that a new category next year. I anticipate the Species Photographed list growing significantly in future years, as many people told me they haven't really kept track of the species they have photographed but they surely will for next year! Honors for 2004 go to Gary Smyle (Frederick) who claims 158 species photographed for the year.

For the **District of Columbia Life List**, Rob Hilton of Montgomery County added six new species this year to finally overtake absentee Ottavio Janni (Italy). Paul Pisano is closing in fast, upping his total to 254 species this past year and leading the **2004 DC List** with a high of 181 species. Fourth place is held by Barry Cooper and Gail Mackiernan (Montgomery), with 244 species. Holding down second place for the annual DC tally are Rob Hilton and DC resident John Beetham, both with a count of 172 species last year.

—Norm Saunders, Locality List Coordinator
marshhawk@att.net

2004 List Report Data Base Statistics

Number reporting for 2004:	80
Number reporting for previous year:	86
Number in data base:	207
Number who have reported during past 5 years:	131
Number of new reporters for 2004:	6

The complete 2004 Report, including narrative highlights for each county and listing all participants, can be found at <http://www.mdbirds.org/birds/mdbirds/locality/lstrep2004.pdf>

MAY COUNT 2005: GUIDELINES FOR PARTICIPATING

The spring birding effort known as “May Count”—detailed in the March/April issue of *The Maryland Yellowthroat*—is set for Saturday, May 14. Your participation, at any level, will be greatly appreciated.

The first step is to contact the County Compiler for the area where you wish to participate; you can find a **List of County Compilers** on page 12. The compiler assigns each observer a specific area that needs coverage. If there’s an area you’d prefer, please inform the compiler, who will determine whether anyone else will also be working in or near the area.

To record and report your observations, please use the **Field Checklist** on pages 13–14. This list is in the correct taxonomic order, as determined by the American Ornithologists’ Union, and incorporates recent nomenclature changes. This checklist is also posted on the MOS web site <http://www.mdbirds.org> under Seasonal Counts.

Those participating in the *Breeding Bird Atlas Project* are encouraged to record breeding bird behavior on an Incidental Report Form and provide the data to the Atlas project coordinator for that county. (In many cases, the May Count compiler is also an Atlas project coordinator.) To assist you in confirming breeding species, birds within “safe dates” on May 14 are shown in *bold italics* on the field checklist form.

Species names followed by one or two asterisks means details must be provided. Some species that require full details, but are very rarely reported, have been removed from this checklist. If you observe a species that is not listed, full details are required in order for the observation to be accepted by the compilers. Brown Pelican no longer requires details, nor does Common Raven in the four

western counties of the state. The MOS web site contains a form with guidelines on reporting rare birds. Provide as many of the requested details as possible. If you have questions, please discuss them with the county compiler.

The report form contains space for reporting “sp” sightings for certain species that occur in large, mixed flocks. Identifying and/or counting the individuals of each species in these flocks is very difficult. Rather than disregard the large number of individuals, it is acceptable to report “sp” sightings. However, please do not report *buteo sp*, *sparrow sp*, *warbler sp*, etc, as these species often occur as single individuals that can be identified with a little extra work. *It is acceptable not to report birds if you are unable to identify them confidently.*

The field checklist contains areas for recording your hours, miles, and weather conditions. Be careful not to double-count hours spent owling when you total your hours for the entire day. Please include the miles you travel *while counting birds* in your assigned area. (Don’t count miles traveled to reach your area, or to reach a food establishment, etc.) Please list all the persons who counted with you in your area.

Provide your completed field checklist to the county compiler no later than June 15. If you cannot meet this deadline, please inform the county compiler as to when your results may be expected.

Have an enjoyable day in the field, and thank you in advance for volunteering your time to this effort.

—Wanda Diane Cole,
Statewide Coordinator for Maryland-DC May Count

MARYLAND ORNITHOLOGICAL SOCIETY 2005 SCHOLARSHIP WINNERS

The MOS Scholarship Committee awarded eight scholarships this year. Congratulations to all.

Three scholarship winners will attend the Field Ornithology workshop on Hog Island sponsored by the Maine Audubon Society. The winners are **Brian Campbell**, a naturalist with the Carroll County Recreation and Parks Bear Branch Nature Center, who won the Chandler Robbins Scholarship; **Ann Davis**, a teacher at the Roland Park Country School, who won the Doris Oakley Scholarship; and **George Yorkston**, a part-time Naturalist at the Harford County Parks and Recreation Anita Leight Estuary Center, who won the John Wortman Memorial Scholarship.

Two other winners will attend Maine Audubon workshops. **Martin Brazeau**, a Library Media Specialist with the Baltimore County Public Schools in Towson, won the Frances Covington-Etta Wedge Scholarship, and will attend the Workshop for Educators on Hog Island. **Taunya James**, a teacher at the Dowell Elementary School in Calvert County, won the Daniel and Helen Gibson–

Dorothy Mendinhall Scholarship, and will attend the Natural History of the Maine Coast workshop.

Three winners will attend the Wade into Ecology workshop sponsored by the Hunt Hill Audubon Camp in Wisconsin. **Susan Muller**, a Resource Technician with the Howard County Recreation and Parks Department, won the Eleanor Robbins Scholarship; **Linda Keller**, who leads bird walks to Lilypons Water Gardens for Fredrick County schools and elsewhere, won the Orville Crowder/Messersmith Scholarship; and **Brad Harrison**, a Science Instructor at the Western School of Environmental Science and Technology, won the Helen Miller Scholarship.

We continue to seek qualified candidates from throughout Maryland and appreciate the work of MOS members in identifying candidates and spreading information about our scholarship program.

—Tom Strikwerda
MOS Scholarship Committee Chairman

Note: Rock Dove is now Rock Pigeon;
 Common Snipe is now Wilson's Snipe

Species in **bold italics** are in their breeding "Safe Dates." We encourage you to try to confirm breeding behavior for these species. Please enter the breeding behavior code on the Incidental Report Form. Breeding bird behavior codes and Incidental Report Forms are downloadable from www.mdbirds.org. Click on Breeding Bird Atlas, Forms, Field Card, and Incidental Report Form.

In the Scope: Dick Kleen

Scratch the surface of the Talbot Bird Club or dig a little deeper, and you will surely find the tracks or shadow of Dick Kleen. This man is a giant, figuratively and literally, amongst the birders of the Maryland Eastern Shore. Hard to miss at six-foot-six, Dick has been a tower of strength and a major source of inspiration for the Talbot County Chapter of MOS since its inception back in 1955. He led the push to establish a chapter in Talbot County and was president of the chapter most of the time for the next 20 years. He established the St. Michaels Christmas Count in 1954 and has actively participated in it every year since then. With superb leadership skills, he developed an admirable record of getting young people as well as adults excited about the birds. He carried his birding interest intensely throughout the state, becoming very familiar with where birds of Maryland could be found. Such activity put him in touch with most of the birders of Maryland, and surely contributed to his becoming the third State President of the Maryland Ornithological Society.

Shortly after coming to St. Michaels High School in 1951, Dick established a Natural Science Club for 7th and 8th grade students. Several charter members of that club went on to illustrious careers in the natural sciences, while also maintaining such strong interest in birding that they continue to be leaders in the Talbot Bird Club. In his 39 years of teaching, Dick's appreciation for all of nature "but particularly for the birds" has been shared with hundreds of students as well as with countless adults who have birded with him or taken birding trips that he has led. He loved being a teacher, and loved working with the students. Some of his greatest joy now comes from seeing the way his students have continued with their interest in birding and also have trained others, thereby passing the joy of birding on and on.

Like many of the great birders, Dick got started with birding at an early age. Born in Brooklyn, he grew up on Long Island, and remembers very well an event that got him "hooked on birding." At age 9, he and his father were digging up a birch tree to move to the Long Island property when Dick saw a beautiful little yellow bird and heard its delightful song. When he got home and they finished

planting the tree, he rushed to the house and got out the family bird book to find out just what that bird was. It was a Prairie Warbler—and Dick was a hooked birder from that moment on. (A beautiful life-size carving of a male Prairie Warbler graces the mantel in his house, along with countless other birding-related items.)

Throughout his adult life, Dick has been a very active birder. He started leading out-of-state trips as soon as the Talbot Bird Club was formed and would take club members to birding spots all around the nation. Texas and Arizona emerged as favored states to visit, so annual trips to those sites were on his schedule for many years. In the 1950s he took groups of students on birding trips into Mexico on four occasions. One of those trips is intensely remembered by all participants as the "14 flats trip." Dick has birded in all 50 states and in 32 countries. He even happened to be birding in Cuba the week before the Castro take-over. He identifies a site in the high desert habitat of the Chiricahua Mountains near Portal, AZ as his favorite birding site. With at least 30 visits to the area, he knows that region very well.

Another region that he knows very well is Blackwater NWR in Dorchester County, where he has provided thousands of volunteer hours. He continues his volunteer work at that site.

Dick admits to being a person who has deeply responded to "the lure of the list." His North American list now includes 718 species. A few years ago he went after a "big-year" list and reached 600 species. He also maintains lists for MD, Talbot County, his home property, and for AZ and TX. Though currently not as active in birding as he once was, Dick still does get out into the field from time to time. His advice to current birders is: "Go birding in southeast Arizona and southern Texas as soon as you can. Don't wait until you retire. Go now!" And for beginning birders, he says, "Try to avoid reading about all the species and numbers of birds that you could have seen years ago. You will just get too depressed."

The interests of birding and birders in Talbot County have benefitted greatly from the energy, dedication, and enthusiasm of Dick Kleen.

—Les Roslund, Talbot County Bird Club

Carving by Ed and Esther Burns of Talbot County. Dick received this carving as a gift from a friend.

A SPORTING PROPOSITION

On May 7 Walter Ellison and Nancy Martin are conducting a Birdathon in Kent County as a fundraiser for the Breeding Bird Atlas Project. They have run Kent County Big Days for the last three years, compiling a composite list of 153 species and averaging 126; their high count to date was 129 on May 18, 2003.

If anyone would like to offer pledges per species, they would be most appreciated. All proceeds will be sent to MOS Treasurer Emy Holdridge (checks made out to MOS) and go towards materials and supplies for the Atlas and paying for blockbusting and miniroute coverage.

—Walter Ellison, MD-DC Atlas Coordinator

MARYLAND/DC RECORDS COMMITTEE STATUS REPORT AS OF MARCH 29, 2005

BY PHIL DAVIS, MD/DCRC SECRETARY

The sighting reports below have changed status since the last committee decision summary was published in The *Maryland Yellowthroat*. This summary covers MD/DCRC review packages 90 through 94. MD/DCRC report numbers are in brackets. These records and reports will be addressed in additional detail in a future issue of *Maryland Birdlife*.

MD RECORDS ACCEPTED:

- White-faced Storm-Petrel**, *Pelagodroma marina* [MD/2004-052]
Atlantic Ocean, Worcester County
August 24, 2004
- "Great White" (Great Blue) Heron**, *Ardea herodias occidentalis* [MD/2001-040]
Ft McHenry/Masonville, Baltimore County
September 26, 2001-September 30, 2001
- Wood Stork**, *Mycteria americana* [MD/2000-019]
Point Lookout State Park, Saint Mary's County
August 19, 1998
- Greater Flamingo**, *Phoenicopterus ruber* [MD/2001-088]
Assateague Island, Worcester County
August 8, 1972-September 3, 1972
- Cackling Goose**, *Branta canadensis hutchinsii* [MD/2004-050]
Eastern Neck, Kent County
December 27, 1964
- Cackling Goose**, *Branta canadensis hutchinsii* [MD/2004-049]
Cambridge, Dorchester County
November 16, 1966
- Cackling Goose**, *Branta canadensis hutchinsii* [MD/1997-391]
Cambridge, Dorchester County
December 29, 1995
- Cackling Goose**, *Branta canadensis hutchinsii* [MD/2004-044]
Little Seneca Reservoir, Montgomery County
January 23, 2003-February 1, 2004
- Swallow-tailed Kite**, *Elanoides forficatus* [MD/2001-083]
Liberty Reservoir, Carroll County
June 15, 1984
- Swallow-tailed Kite**, *Elanoides forficatus* [MD/2002-014]
Pickering Creek, Talbot County
May 5, 2001
- Swallow-tailed Kite**, *Elanoides forficatus* [MD/2003-102]
Fort Smallwood Park, Anne Arundel County
March 24, 2003
- Swallow-tailed Kite**, *Elanoides forficatus* [MD/2003-105]
Marydel, Caroline County
May 12, 2003
- Swallow-tailed Kite**, *Elanoides forficatus* [MD/2004-020]
Elkton, Cecil County
May 29, 2004-June 17, 2004
- Mississippi Kite**, *Ictinia mississippiensis* [MD/1997-365]
Point Lookout State Park, Saint Mary's County
May 20, 1995

- Curlew Sandpiper**, *Calidris ferruginea* [MD/2004-051]
Assateague Island State Park, Worcester County
August 9, 2004-August 21, 2004
- Long-tailed Jaeger**, *Stercorarius longicaudus* [MD/2003-118]
Tilgman's Island, Talbot County
September 19, 2003
- South Polar Skua**, *Stercorarius maccormicki* [MD/2000-036]
Atlantic Ocean, Worcester County
June 4, 2000
- Black-tailed Gull**, *Larus crassirostris* [MD/2000-055]
Assateague Island, Worcester County
October 7, 2000-October 15, 2000
- Black-tailed Gull**, *Larus crassirostris* [MD/2003-112]
Fort McHenry, Baltimore County
September 16, 2003
- Sooty Tern**, *Sterna fuscata* [MD/2003-129]
Elms Beach, Saint Mary's County
September 22, 2003
- Sooty Tern**, *Sterna fuscata* [MD/2004-060]
Assateague Island, Worcester County
September 9, 2004
- Eurasian Collared-Dove**, *Streptopelia decaocto* [MD/2002-017]
Port Deposit, Cecil County
April 15, 2002-June 20, 2002
- Gray Kingbird**, *Tyrannus dominicensis* [MD/2002-033]
Jug Bay Wetlands Sanctuary, Anne Arundel County
September 25, 2002
- Brown-headed Nuthatch**, *Sitta pusilla* [MD/2004-001]
Eastern Neck NWR, Kent County
October 19, 2003
- Bohemian Waxwing**, *Bombycilla garrulus* [MD/2004-007]
Queenstown, Queen Anne's County
February 7, 2004-February 10, 2004
- Black-throated Gray Warbler**, *Dendroica nigrescens* [MD/2003-114]
Assateague Island National Seashore, Worcester County
October 22, 2003
- Spotted Towhee**, *Pipilo maculatus* [MD/2004-016]
Fort McHenry National Monument, Baltimore County
May 19, 2004

MD RECORDS ID OK/?? ORIGIN:

- Silver Gull**, *Larus novaehollandiae* [MD/2000-064]
Upper Marlboro, Prince George's County
November 30, 2000-December 4, 2000

MD RECORDS ID OK/EXOTIC ORIGIN:

- European Greenfinch**, *Carduelis chloris* [MD/2002-004]
Hancock, Washington County
February 5, 2001-February 24, 2001

MD RECORDS NOT ACCEPTED:

- Pacific Loon**, *Gavia pacifica* [MD/1997-754]
Susquehanna River, Cecil County
November 7, 1997-November 18, 1997
- Cackling Goose**, *Branta canadensis hutchinsii*
[MD/2004-042]
Centennial Park, Howard County
February 26, 2004
- Franklin's Gull**, *Larus pipixcan* [MD/1999-040]
Burkittsville, Frederick County
May 8, 1999
- Sabine's Gull**, *Xema sabini* [MD/2000-031]
Deal Island, Somerset County
June 24, 2000
- Black Guillemot**, *Cepphus grylle* [MD/2002-011]
Assateague Island, Worcester County
December 28, 1989
- "Red-shafted" Flicker**, *Colaptes auratus* [MD/2003-107]
Blackwater NWR, Dorchester County
February 23, 2003
- Green-tailed Towhee**, *Pipilo chlorurus* [MD/2001-014]
Indian SpringsWMA, Washington County
April 26, 2001

DC RECORDS ACCEPTED:

- Band-rumped Storm-Petrel**, *Oceanodroma castro*
[DC/1999-060]
Navy Yard Bridge
August 29, 1893
- Brown Pelican**, *Pelecanus occidentalis* [DC/2004-013]
Potomac River
March 20, 2004-March 23, 2004
- Greater White-fronted Goose**, *Anser albifrons*
[DC/2002-006]
West Potomac Park
May 19, 2001
- Black-chinned Hummingbird**, *Archilochus alexandri*
[DC/2003-141]
Smithsonian Institution
November 17, 2003-December 12, 2003
- Ash-throated Flycatcher**, *Myiarchus cinerascens*
[DC/2001-077]
Kenilworth Park
November 11, 2001-November 12, 2001
- Nelson's Sharp-tailed Sparrow**, *Ammodramus nelsoni*
[DC/1999-010]
(locality unrecorded)
September 15, 1862

DC RECORDS NOT ACCEPTED:

- Parasitic Jaeger**, *Stercorarius parasiticus* [DC/1997-171]
Anacostia River
June 21, 1994

MARYLAND/DC RECORDS COMMITTEE HIGHLIGHTS

The Maryland/District of Columbia Records Committee (MD/DCRC) held its annual business meeting on March 5, 2005. Highlights are reported below. The detailed minutes and other reference information can be found on the committee's web page, on the MOS web site, at <http://www.mdbirds.org/mddcrc/rcindex.html>

Data Products. The committee's data products will be updated on the MD/DCRC web pages, including the Official Lists of the Birds of MD and of DC and the Review Lists for MD and DC.

New on the **Official List of the Birds of MD** are Reddish Egret, Eurasian Collared-Dove, Cackling Goose (due to the recent AOU split), and Greater Flamingo (!!!)—from a report reopened of a 1972 Assateague Island, post-hurricane bird. New species added to the **Official List of the Birds of DC** include Brown Pelican and Black-chinned Hummingbird. The MD list now stands at 424 species and the DC list stands at 325.

Updated MD Review List: As of March 30, 2005, American White Pelican will no longer be reviewed in MD (all reports prior to March 30 will be reviewed); Rufous Hummingbird will no longer be reviewed in MD (observers are still strongly encouraged to report and have "western" hummingbirds banded, since rarer species are difficult to separate; note that Rufous Hummingbirds are still reviewable in DC); Swallow-tailed Kite will no longer be reviewed in MD; the reviewable range of Common Raven in MD is redefined as "south and east of Frederick AND Montgomery Counties;" Cackling Goose will not be reviewable in MD (although subspecies other than *hutchinsii* should be reported and are reviewable as "subspecies/forms unusual to MD"). Great Skua is now reviewable anywhere in MD.

Updated DC Review List: Lark Sparrow and Yellow-headed Blackbird are now reviewable in DC.

Members. Three new members were elected for three-year terms; Hans Holbrook (Howard), John Hubbell (Montgomery), and George Jett (Charles). The committee thanks retiring members Barry Cooper (Montgomery), Matt Hafner (Harford), and Bonnie Ott (Howard).

County Checklist Coordination. With the Committee's enhanced database capabilities, it is easy to generate MD/DCRC reports of "county" sightings. The MD/DCRC is willing to work with a single county point-of-contact to provide a county "rarities" listing for the local birding community to review for data errors and omissions, and also as a means of locating outstanding sighting documentation. Local chapters can designate a single county point-of-contact to obtain these reports from the MD/DCRC Secretary.

Records Highlights (continued from page 17)

ID Workshops. The committee discussed the concept of one or a series of identification workshops; these could be half-day Saturday sessions targeting advanced-intermediate field birders and using projected field guide images and/or photos to explore challenging ID pairs or trios that might currently be found around the state or that might be expected in the future (for example, Shiny Cowbird vs. Brown-headed Cowbird, Eastern vs. Western Meadowlark, Eurasian Collared-Dove vs. Ringed Turtle-Dove). This idea will be explored further with the new Statewide Educational Activities Committee.

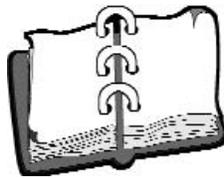

Publications. The publication situation was discussed; the committee is in the process of catching up on its decision reports. These have previously been published in *Maryland Birdlife*, but page limitations and the *Birdlife* publication schedule are not conducive to continuing this practice. It was agreed that these decision reports, as well as a lengthy manuscript by Marshall Iliff, "An Annotated Checklist of Subspecies and Forms Seen in Maryland," be published as issues in the *Maryland Avifauna Series* and be published on a CD-ROM (including color images), with PDF copies to be available from the MOS web site. [The *Maryland Avifauna Series*, a series of "occasional papers" published by the MOS, includes the two "Yellowbooks."]

—Phil Davis
MD/DCRC Secretary
pdavis@ix.netcom.com

ANNUAL COUNT

The annual count of species seen in Maryland by April 18 stood at 239 species, or 56.4% of the state list, even adding in the two species included in the latest official list. We are moving along very steadily.

—Fran Saunders
MOS Web Site Director
<http://www.mdbirds.org/>

MOS Calendar

May-August 2005

Sunday, May 1

■ Anne Arundel. Patuxent Research Refuge, North Tract for migrant and breeding woodland birds. Half day. Meet 6:30 AM at Parole P&R. Leader: Fred Fallon, 301-249-1518.

■ Baltimore. Cylburn self-guided walk. Meet at Mansion's front porch Sunday mornings for series of easy birding in gardens and urban forest. Beginning birders welcome. Expect to find variety of migrant and resident birds. No designated leader. Coordinator: Joe Lewandowski, 410-358-7834, ilenel@juno.com.

■ Harford. Palmer SP along Deer Creek, 650 acres of wildflowers and forest interior birds. Meet 7 AM at Rte 1 and MD 136 Wawa. Moderate hiking on dirt trails. Contact: Russ Kovach, 443-386-4787.

■ Kent. Millington area for spring migration at its peak—warblers, grosbeaks, warblers, flycatchers, and warblers (we hope). Half day. Info: Walter Ellison or Nancy Martin, 410-778-9568, or Peter Mann, 410-648-5205.

■ Baltimore. Marriottsville Warblers. Resident warblers include Prothonotary and Worm-eating. Yellow-throated Warbler and Barred Owl possible. Meet 8 AM. [From Beltway exit 18 Liberty Rd, west 4.9 miles to Marriottsville Rd. Left 4 miles past quarry and rifle range to unmarked, narrow road with mailboxes, just before bridge. Turn right, continue to small unpaved parking lot on left.] Leader: Paul Noell, 410-243-2652, mycoconut@msn.com.

■ Talbot. Adkins Arboretum Beginners Walk. Please bring along a new birder of any age. Come and meet members of award-winning

junior World Series of Birding Team from Centreville Middle School prior to their participation in this year's competition in Cape May, NJ. Depart Tred Avon Shopping Center parking lot in front of Acme, Easton. 7 AM. Lunch Host: Sylvan Kaufman. Leaders: Sylvan Kaufman and Wayne Bell, 410-820-6002.

■ Howard. Hugg-Thomas WMA. Meet at gravel lot 8 AM. Half day. Moderate walk through woodlands and field edges. Great habitat for warblers, tanagers, and vireos. Nesting Hooded, Kentucky, Ovenbird, and Louisiana Waterthrush. No facilities. Leaders: Dave and Maureen Harvey, 410-795-3117.

Tuesday, May 3

■ Baltimore. Lake Roland. Weekly walks to follow progress of migration. Meet 8:30 am. Two-three hours and miles of walking. Early departure optional. Some uneven terrain and steep dikes optional at far end. Spring migrant songbirds. Yellow-crowned and Black-crowned Night-Herons possible. Park and walk to footbridge. Leader: Mary Chetelat, 410-665-9769.

MEETING. **Baltimore.** "Identifying Spring Warblers by Sight and Song," by Peter Webb, president of Baltimore Bird Club. Cylburn Arboretum, 4915 Greenspring Ave. Doors open 7 PM for refreshments and socializing. Lecture 7:45-9 PM.

Wednesday, May 4

MEETING. **Carroll.** 7:30 PM at Senior Center, Stoner Ave, Westminster. Jerry Tarbell will present this year's Final Exam. For more info, contact Laura Tarbell, 410-857-1109.

■ indicates Field Trips
 indicates Atlas Trips

H Baltimore. First Wednesdays at Ft. McHenry. 9:30 AM-Noon. Continuing survey of bird activity at the Fort. Canceled in bad weather. Leader: Jim Peters, 410-429-0966.

H Montgomery. Flag Ponds, Calvert Co. Two-thirds day. Local expert Arlene Ripley leads us through woods, bog, and beach of limited-access nature park to see migrants, arriving breeders (notably Yellow-throated Warbler), as well as such spring flora as showy orchis. Limit 12. Reservations required. Details, directions from Coordinator: Lydia Schindler, 301-977-5252.

Thursday, May 5

MEETING. **Frederick.** *Bill Young* will present "Back of the Outback: Birds of the Australian Outback." 7 PM at C. Burr Artz Library, Frederick. Info: Marcia Balestri, 301-473-5098.

Friday, May 6

MEETING. **Anne Arundel.** "Conservation of Black and Turkey Vultures" by *Dr. Jim Fraser*. 8 PM DNR Conference Room, Tawes Bldg, Rowe Blvd, Annapolis.

H Montgomery. Pennyfield Lock. Half day. Birding by ear (with timed intervals for talking). Migrant and nesting land birds. Meet end of Pennyfield Lock Rd 7 AM. Required reservations can be made with either Leader: Cyndie Loeper, 301-530-8226, or Ann Lucy, 301-229-8810.

MEETING. **Harford.** Open Carousel Night hosted by Dave Ziolkowski at Churchville Presbyterian Church, Churchville, 7 PM. Bring birding-interest slides from travel or scientific endeavors or just plain bird oddities. Light refreshments. Info: Jean Wheeler, 410-879-7424.

Saturday, May 7

H Anne Arundel. Franklin Point, other nearby spots, for waterfowl and woodland birds. All day. Bring lunch. Meet 7 AM at Parole P&R. Leader: Dale Johnson, 410-867-7743.

H Howard. Jug Bay Boat Trip. Meet Meadowbrook P&R 5:30 AM. All day. Limit 16. Join naturalist Greg Kearns for morning boat trip through wetlands of Jug Bay. Over 100 species expected. Trip will last 3 hours. Plan for picnic lunch and early afternoon bird walk along trails. Facilities available. Boat fee \$5-\$6 per person. To sign up, call Bonnie Ott, 410-461-3361.

H Frederick. Warbler Watch at Marcia Balestri's House. Over the last 12 years, 28 species of warblers have migrated through Marcia's yard! Meet 7:30 AM at her house; for directions, contact Marcia, 301-473-5098.

H Cecil. Cecil Warblers. Mix of hotspots for spring migrants. Half day. Meet 7 AM Big Elk Mall Dunkin Donuts parking area. Leader: Marcia Watson-Whitmyre, mww@udel.edu.

H Talbot. Delaware Bay Shore: Bombay Hook NWR, Woodland WMA, and Thorofare Rd in quest of shorebirds. Bring lunch. Depart Tred Avon Shopping Center parking lot in front of Acme, Easton 6:30 AM, or depart LL Bean Parking Area, Prime Outlets, Queenstown 7 AM. Leader: Charles Hopkins, 410-763-8742.

H SPRING COUNT AT FRED ARCHIBALD SANCTUARY. **Frederick.** Meet at Sanctuary 6 AM. Dress warmly, with waterproof boots. Contact Bob Schaefer, 301-831-5660, for further info.

H Baltimore. Patterson Park, at White House (27 South Patterson Park Ave). Migrants found in this urban park last spring included Blue-headed, Red-eyed, White-eyed, and Warbling Vireos, Wood, Swainson's, and Gray-cheeked Thrushes, Veery, Summer Tanager, Merlin, and Woodcock! Meet 8 AM. From downtown Baltimore, drive east up Pratt St, left onto S Patterson Park Ave, and park on this street in first or second block. The White House is just inside

west edge of park at intersection of S Patterson Park Ave and Lombard St. Leader: Dave Curson, 410-675-4963.

H Montgomery. Blue Mash Nature Trail. Half day. Site should be hopping with migrants and other woodland edge birds. Waterproof boots essential. Meet 7 AM at Zion Road parking lot. Limited to 8-10 participants. For reservations and directions, call Leader: Rick Sussman, 301-774-1185.

Sunday, May 8

H Baltimore. Patuxent Research Refuge, North Tract, Prince George's Co, for Summer Tanager, Blue Grosbeak, Chat, and other Southern specialty birds. Prothonotary Warbler possible. Bring lunch. Meet 7:30 AM at Nursery Road P&R, Baltimore Beltway exit 8. Leader: Steve Sanford, 410-922-5103, scartan@verizon.net.

H Baltimore. Cylburn self-guided walk. See May 1.

H Anne Arundel. Kinder Farm Park for migrants and resident birds. Half day. Meet 6:30 AM at Severna P&R. Leader: George Thomas, 410-647-5082.

H SPRING COUNT AT AUDREY CARROLL. **Frederick.** Call Dave Smith, 410-549-7082, to participate.

H Talbot. Easton Stream Bottoms. Explore stream bottoms east of Rte 50 for variety of migrants. Depart Tred Avon Shopping Center parking lot in front of Acme, Easton 7 AM. Leader: Jan Reese, 410-745-2875.

H Harford. Harford Glen. Hike forests and wetlands with Phil Powers for shorebirds, migratory songbirds, and wildflowers. Jack-in-the-pulpit, wild ginger, and wild geranium should delight flower enthusiasts while birders might enjoy Spotted, Solitary, and Least Sandpipers in addition to a mixed bag of warblers, vireos, and orioles. Meet 7 AM upper parking lot, Harford Glen. Contact Phil, 410-679-4116.

MOS Calendar (continued from page 19)

H **Montgomery.** Little Bennett RP. Half day. Near peak migration for warblers and vireos, including those breeding in this varied habitat. Reservations required. For time and directions, contact Leader: Gemma Radko, 301-607-4374.

Tuesday, May 10

H **Baltimore.** Lake Roland. Weekly walks to follow progress of migration. See May 3.

Wednesday, May 11

H **Baltimore.** Hampton National Historic Site. First year monitoring this interesting site. Explore 70 acres of woods, fields, pasture land, and formal gardens. Easy walking. Canceled in bad weather. Meet at Site 8 AM for 3 hours. Leader: Jim Peters, 410-429-0966.

H **Montgomery.** Rugged Green Ridge SP, Allegany Co. Full day. "Facilities natural." Meet Sidling Hill VC parking lot off I-68 7 AM sharp. Bring snacks, lunch, and insect repellent. 4-wheel drive or pickup truck recommended. Prior arrangements to car pool via Leader strongly suggested. Wear sturdy boots; some hiking necessary. Sunday, June 26

PICNIC. Washington. 4 PM Washington Monument SP. Bring own chair, plate, utensils, drink, and dish to share. Info/directions: Anna Hutzell, 301-797-8454.

Saturday, July 2

 **Montgomery.** Blue Mash Nature Trail. See May 7.

Telling Tales

Heading toward the Great Dismal Swamp, the car caravan led by Paul DuMont was stringing out. To pull them together, Paul drove into, and then out of, a weigh station. Bringing up the rear, Dan Eberly was waved down by an irate station manager. Dan tried to explain that he was just following the leader. "Following!" sputtered the man. "Would you follow him into a swamp?!" Dan could only shrug: "Well....."

Many thanks to Candi Lee for skillfully and cheerfully shepherding and shaping the Yellowthroat Calendar for the past two years.

FILM REVIEW

The Wild Parrots of Telegraph Hill

After seeing *Winged Migration*, my non-birding friends remarked that they now understood my obsession with birding. I was less enchanted with the film (it seemed somewhat staged and I hated the distracting music), and I thought to myself, hmmm, it still doesn't compare to the actual wonder of experiencing birds live in the field.

So when *The Wild Parrots of Telegraph Hill* came to town, I knew I had to see it, if just for comparison. Director Judy Irving does more than just aim her camera at the birds (the close-ups of the vibrantly colored parrots are marvelous): the structure and smooth flow of the narrative reveal her skill as an Emmy award-winning film maker. She captures the beauty and spirit of this wild (but released/escapees) flock of some four dozen Conures—Cherry-headed, Blue-crowned, and Mitred—and their daily struggle against predators and disease.

But the film is more about the flock's caretaker, Mark Bittner, a poetry-quoting, free-spirited relic of the sixties. He's kind and intelligent, and through his daily feeding (and caring for injured birds) he has become something of an expert on parrots. He's given them all names—

Picasso, Sophie, Katherine, Mingus, and Pushkin—and as the film rolls along you feel the individuality of these birds. Bittner himself warns of the danger of anthropomorphism, but I still twitched at the Disneyesque scene where Mingus sways, seemingly in perfect rhythm, to Mark's guitar riffs. (The audience loved it.)

It's a feel-good movie complete with a surprise ending. So go see it and take your non-birding friends; they'll be sure to remark on how they can now understand your fascination with birds.

—Linda Friedland
Montgomery Bird Club

LAST CALL
